▶ **PRICING:** Available now

» **WARRANTY INFORMATION:**

▶ **BASE WARRANTY:**

5 yr parts / 20 yr heat exchanger

▶ **REGISTERED WARRANTY:**

10 yr parts / Lifetime heat exchanger

» **MODEL NUMBERS:** See table

In the coming weeks, changes will be made within our existing S9X2 model family. This family will be upgraded to a 9-tap constant torque ECM blower motor and will also include a new heat exchanger design that reduces noise levels in liquid propane (LP) and natural gas applications. With these changes, 4 additional models now reach 96% AFUE! Only one model saw a reduction from 96% to 95% AFUE.

Using the new 9-tap constant torque ECM blower motors, we were able to consolidate certain models and reduce the S9X2 model family size. This consolidation reduces the number of models that dealers and distributors must carry, all while offering the same functionality as before.

The chart displayed details the models that are phasing out with these changes, as well as the models that will replace them. Orders placed on models that are phasing out will be fulfilled based on unit availability.

OLD MODEL	NEW MODEL	AFUE
S9X2B040U2PSAB	S9X2B040U3PSBA	96%
S9X2B040U3PSAB
